How to use wireless adapter

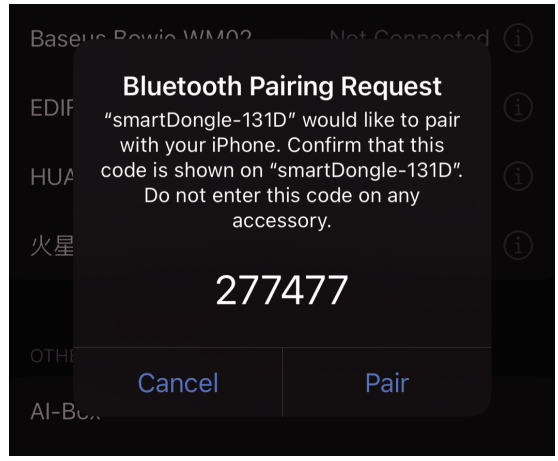

① Start the car and wait for the car system to be loaded.

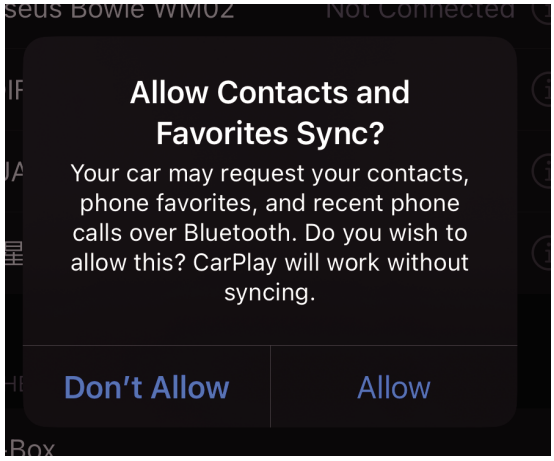

② Connect the Wireless Carplay/Android auto adapter to the USB-A or Type-C port in your car.please be sure plug the adapter into the port that is for wired apple carplay or android auto.

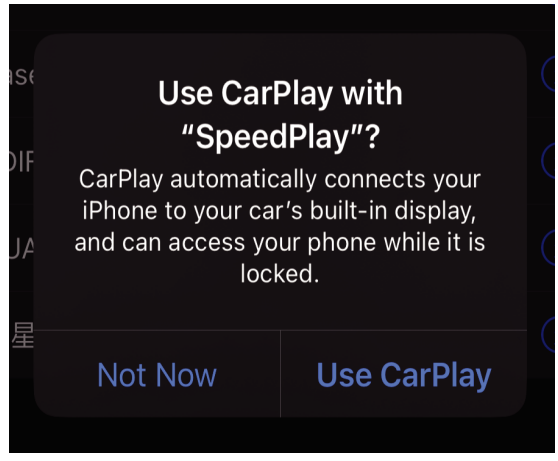

③ Open WiFi and Bluetooth on your iPhone/Android smart phone and find the Bluetooth name
Click on Pair; Click on 'Allow'; Click on Use Carplay or 'Use Android Auto'.

④ You are ready to enjoy wireless CarPlay or wireless Android Auto.

Please note

① The wireless Carplay Android Auto adapter working principle is uses Bluetooth to establish a pairing between the iphone/ Android Smartphone and the vehicle, then switches to using WiFi to maintain the wireless connection .After the Bluetooth pairing is successful, the iPhone/Androind smartphone WiFi will automatically connect to the adapter's WiFi, and then disconnect the Adapter Bluetooth connection by default for carplay and automatically connect to your vehicle Bluetooth by default for Android auto.

② Please ensure wireless Carplay Androind auto Adapter power on.

③ Please ensure that your car models supports wired carplay/Android auto.

FQA

1.What is the WiFi password for the Wireless Carplay Adapter?

We need to connect the bluetooth,not WiFi.After Bluetooth matching is successful,WiFi will automatically connect.
So no need wiFi password.Make sure your WiFi is turned on and unoccupied when pairing.

2.After pairing Android Auto adapter, can not start Android Auto function or compatible/can not recognize the USB...

(1) If your car has use the android auto function for the first time,please use your data cable to connect your phone to activate android auto through a wired method.

(2) Please make sure that android auto on your android phone is the latest version.lf not,please log in to your google play account to update to the latest version.

(3) Please turn off the Bluetooth of your phone and enter the mobile application management to search auto to clear the auto cache.After the cleaning is completed,Restart the adapter and reconnect to Bluetooth.

3.Audio input or output issues : calls rejected or for warded to voicemail/ no play sound /microphone not working/music playback interrupted or paused /voice functioning abnormally..

(1) Please check if the iphone/Android smartphone's Bluetooth connect to other devices such as Earphone, watch.....If so Please disconnect other auto-connected Bluetooth devices or turn off the Bluetooth directly for carplay and connect to your vehicle bluetooth for android auto.

(2) When on a call, check that your "Audio" output option is Carplay/ Android Auto.

4.When use the wireless carplay Android Auto Adapter whether Mobile Phone can use other internet wifi

When enjoying the wireless android auto adapter function, the phone's WiFi will be occupied by the adapter, So you can not use other internet at the same time, You only can use your phone SIM card internet.

5.Unable to automatically reconnect

(1) Please make sure that the Bluetooth and WiFi functions of your mobile phone are turned on and the Bluetooth is not occupied when you get in the car.

(2) Clear the pairing record, restart the phone and repair the Adapter.

6.Can the adapter be paired with multiple phones

The adapter can be paired with maximum five phones, but only one device can be connected at a time, if you would like to pair it with a new phone, please cancel the current connection first Please note, by Bluetooth function default,the adapter's system will only auto-connect back to the last used phone.

7.Can't find the bluetooth and WIFI of the wireless Carplay Android Auto Adapter ?

Please make sure wireless CarPlay/Android auto adapter is power on and be sure plug the adapter into the port that is for wired carplay/ Android auto.

If convenient, Please test it with another Phone. If only a specific phone cannot find the Bluetooth or Wi-Fi of the adapter please try to reset the network and bluetooth settings of this Phone and then restart the phone once, if the same problem happens on other Phone, it will be defective,please let us know.

8.Whether Wireless Carplay Android auto Adapter support Youtube Video

Can not support Youtube for wireless carplay.

Can support Youtube for wireless Android Auto.Please follow the operation to open Google Chrome and type.

"AAADAPK"-----Download APK------Open "AAAD" ----download" Carstream" -----Open"Carstream" and go to setting ,choose" enable desktop mode",and then you could enjoy the video from Youtube by wireless android auto Setting Video.

Firmware update

◎ The adapter works properly, it means the current version is suitable for your car. lt is not recommended to update the firmware.
◎ Only try this solution when the problem you cannot solve from the "FQA".

1. Power up the adapter.
2. Connect the adapter's WiFi the password is "12345678".
3. Open web browser and enter"192.168.1.101" to enter the setting page and click"Online Update" for Carplay function.
4. For Android auto,Please Click"Switch P2p"Then Click "OK".
5. Return to WiFi Connect, Find "Wi-Fi Direct" option ,Then connect the Available devices(This step only for Android phone users as reference, if use iphone update the firmware, please ignore "Wi-Fi Direct" step).
6. Return to the browser's page Click "Update".
7. On the same page, you could also fill in the car brand, model, years,and more details,next tap "Submit to report the issue. Our engineers will record your problem and research possible solutions.
